

Murat YAGAN

Mechanical Engineering Student

RESUME :

Solid command of technologies, tools and best practices in designing mechanical equipment using CREO Parametric, SolidWorks and engineering drawings.

Strong team collaboration skills to work closely with team members to achieve engineering goals.

Passionate about mechanics and especially complex mechanisms and new technologies, I have always been curious and self-educated.

EDUCATION :

2017 - Now – Bachelor's Degree

Mechanical engineering and Production Management
University of Grenoble Alpes

2016 – BTEC Higher National Diploma (equivalent)

Mechanical engineering and Production Management
University of Grenoble Alpes

-Statics, Kinematics, Dynamics, Engineering Analysis, Materials Science and Dimensioning, Mechanical Conception and Fabrication, Metrology, Fabrication Process Selection, Industrial Automatism,

2014 – High School Diploma in Science (GCE A-levels equivalent)

WORK EXPERIENCE :

November 2016 - July 2017 – TRIGANO MDC Drawing office and Process

A successful 9-month experience in this European manufacturer of motorhomes and caravans, my goal was to develop new products: Design and prototyping. As well as the industrialization of these products: definition range of assembly and plan of manufacture.

In addition I was responsible for the product design of the project of launching sales to individuals via e-commerce.

April/June 2016 – CORIM SOLUTION Internship

An internship of 11 weeks in this SMEs, software integrator of CMMIS/EAM. My mission was to research regulatory maintenance and create a database of these maintenances in the CMMIS software.
